BROSZEIT WOOD MOSAIC

CREATE UNIQUE WOOD SURFACES

If you want to create a varied and modern wood cladding, you will find the right product with Broszeit WOOD MOSAIC. The different designs are characterised by individuality and versatility. Whether wall panelling in the living room, bar panelling with indirect lighting, column panelling or door fronts, with the Broszeit WOOD MOSAIC series we offer you a wide range of design options. These can be used both in new buildings and in modernisation projects.

Due to the high flexibility of the individual tiles, straight, curved and even circular surfaces can be mastered easily and quickly without much effort. You can see how easy the tiles of the Broszeit WOOD MOSAIC series can be processed in the processing recommendations. Basically, the Broszeit WOOD MOSAIC tile does not need to be surface-sealed or the joints grouted after it has been applied to a support, such as a wall.

The Broszeit WOOD MOSAIC tiles are delivered packed in boxes of 20 pieces each. A black fleece on the back makes the Broszeit WOOD MOSAIC tiles very flexible to use. They are very easy and quick to attach to the wall, for example. At the moment, the available wood types are natural oak and smoked oak. Other types of wood will be in stock in the future. Of course, it is also possible to treat the Broszeit WOOD MOSAIC tiles with paint or stain - similar to other solid wood. All Broszeit WOOD MOSAIC tiles in stock are delivered without surface treatment, i.e. raw.

Broszeit wood mosaic
