

EASY PLUG® AND EASY SLAT® ARE BRANDS OF THE NEUGERSWERKE HOLZWERKE GMBH IN SAXONY.

With its plant in Neugersdorf, Neugerwerke Holzwerke GmbH is a specialist in the production and coating of plywood. Here, plywood panels in birch, beech and poplar and HPL as well as CPL surfaces can be coated with all desired backing materials.

The processing and assembly centre is located at the Großröhrsdorf site. Here, the elements can be processed according to special customer requirements.

Sales and marketing of the products manufactured here are carried out by the Broszeit Group, which means that sales take place in a worldwide distribution network.

EASY PLUG® & EASY SLAT®

FORMWORK QUICKLY, SIMPLY AND COST-EFFECTIVELY REPAIRS

REPAIR SYSTEM FOR USED SHUTTERINGS FOR SMOOTH AND FAULTLESS CONCRETE SURFACES

ADVANTAGES WITH THE EASY PLUG® SET

FAST & EFFICIENT

Quick and easy repair of holes, scratches anchor holes or nails in used formwork

ECONOMICAL & EFFECTIVE

with very little effort you get smooth and flawless concrete surfaces

PROFITABLE & DURABLE

through a low investment Regeneration of used formwork

PRECISE & UNIQUE

special drills and cutters and the 220g/m² coated repair plates enable a highly precise result and thus a smooth concrete surface

EASY SLAT®

With the EASY SLAT® set and its tools specially developed for this application, scratches up to a length of 600 mm can be repaired quickly and easily.

EASY SLAT® is available in variable lengths between 100 mm and 600 mm. The slats are 3.2 mm thick and coated on one side with 220g/m² phenolic resin, the reverse side with waterproof film.

To repair larger damages, several plates had to be placed next to each other until now.

Due to the high precision and exact matching of drill and plate, you get a very smooth surface and thus an almost invisible edge on the concrete skin.

This prevents damage before it occurs or has to be removed at great expense. Directly on site at the construction site.

EASY PLUG®

EASY PLUG® repair plates are available in sizes 40 mm and 60 mm. The thickness is 3.2 mm.

Standard is phenolic resin with a coating thickness of 220g / m² and a waterproof coating on the back! This means that there is no more unwanted swelling! Also no ugly marks on the concrete surface!

EASY PLUG® is available in variable surfaces and colours, e.g. also in wood-filled PP.

As all our products are 3.2 mm thick, you do not need any separate tool settings or conversions.

This means that your used formwork can be used for longer, which saves effort and money.

EASY PLUG® SET

THE EASY PLUG SET WITH ALL THE NECESSARY TOOLS AND ACCESSORIES FOR REPAIRING FORMWORK DAMAGE. FLEXIBLE AND READY FOR IMMEDIATE USE DIRECTLY ON SITE.

- ▶ Specially developed tools with cylinder head drill
